

# May 2025 System Expansion Rate Schedule

## TO OUR VALUED CUSTOMERS

Premises added under these new rates will remain on system expansion rates for 10 years. The purpose of this brochure is to update several annual reconciling mechanisms that had price changes during 2024 and show what rates are available to our customers.

## RESIDENTIAL CUSTOMERS

Residential customers have two separate rates:

**RSH-SE** (Residential Service Heating) rate. This rate is for customers using natural gas as their primary home heating source.

**RMDS-SE** (Residential Multi-Dwellings Service) rate. This rate is designed to serve all multi-dwellings with six (6) or more units served through a single meter. Customers qualifying for the RMDS-SE rate continue to have the option of buying their gas from a third party supplier.

## COMMERCIAL/INDUSTRIAL CUSTOMERS

The new rates for commercial/industrial customers have been designed around 12 months of usage. Customers are assigned a rate based on their annual consumption:

**SGS-SE** (Small General Services) rate is designed for customers using less than 5,000 CCF (hundred cubic feet) annually.

**MGS-SE** (Medium General Services) rate is designed for customers whose annual usage is between 5,000 and 30,000 CCF.

**LGS-SE** (Large General Services) rate is designed for our largest customers whose annual usage is greater than 30,000 CCF.

## EXPLANATION OF OTHER CHARGES:

**Customer Charge:** A fixed monthly charge designed to recover the Company's basic administrative expenses associated with maintaining and servicing a customer account.

**Conservation Adjustment Mechanism (CAM):** A charge that collects the cost of conservation programs available to customers.

**Daily Demand Metering:** A fixed monthly charge for the cost of providing daily usage information. The charge is prorated based on the percentage of successful daily reads as compared to the number of days in the customer's billing cycle.

**Decoupling Mechanism:** A charge or credit to collect or refund the difference between the actual distribution revenue for a given year as compared to the allowed revenue for that same year as approved in the company's latest rate case decision.

**Delivery Rate:** A charge for moving natural gas across the Company's distribution lines to a customer's home or business.

**Demand Charge:** A charge for providing local pipeline space to accommodate the customer's highest daily usage.

**Distribution Integrity Management Program (DIMP):** A charge for expenses related to any pipeline replacement for cast iron and bare steel mains and services each year.

**Sales Services Charge (SSC):** A fee designed to recover unique costs specific from those customers that receive their gas supply directly from the Company.

**TSC Onsite Demand Cost:** A transportation service charge that is designed to recover unique administrative costs specific from those customers that receive their gas supply from a third-party supplier.

**TSC Shifted Cost:** A transportation service charge that is designed to recover supplier of last resort costs from those customers that receive their gas supply from a third-party supplier.

Bills less than 28 days or more than 34 days will be prorated.
